S1	Class hierarchy, constructors, <code>getArea()</code> , <code>contains()</code>	4	
	<code>draw()</code>		1
	Users should be able to change the properties of the selected rectangles.		1
S2	Class hierarchy, constructors	4	
	Should you override the <code>draw()</code> , <code>contains()</code> and <code>getArea()</code>		
	<code>draw()</code> , smallest dimensions		1
	A square should not be transformed into a rectangle when increasing its width or height.		1
S3	Class hierarchy, constructors, <code>getArea()</code> , <code>contains()</code>	4	
	<code>draw()</code>		1
	Users should be able to change the properties of the selected ellipses.		1
S4	Class hierarchy, constructors	4	
	Should you override the <code>draw()</code> , <code>contains()</code> and <code>getArea()</code>		
	<code>draw()</code> , three lines, random points		1
	Users should be able to change the properties of the selected starsmap.		1
S5	Class hierarchy, constructors	4	
	Should you override the <code>draw()</code> , <code>contains()</code> and <code>getArea()</code>		
	<code>draw()</code> , smallest dimensions, rotating		1
	A circle should not be transformed into an ellipse when increasing its width or height.		1
S6	MovingShape: <code>message</code> , <code>DEFAULTMESSAGE</code> , <code>getMessage()</code> , <code>setMessage()</code> , <code>drawMessage()</code>	2	
	AnimationPanel: <code>currentMessage</code> , <code>getCurrentMessage()</code> , <code>setCurrentMessage()</code>	2	
	constructors in subclasses		1
	<code>drawMessage()</code>		1
	<code>draw()</code>		2
S7	class hierarchy, constructors	2	
	Shapes move around the boundary of the <code>JPanel</code> .		3
S8	Information of shapes are displayed in ascending order by area	5	
S9	Include your name, UPI and a comment at the beginning of <b>ALL YOUR FILES</b>		2
